Brown Lock

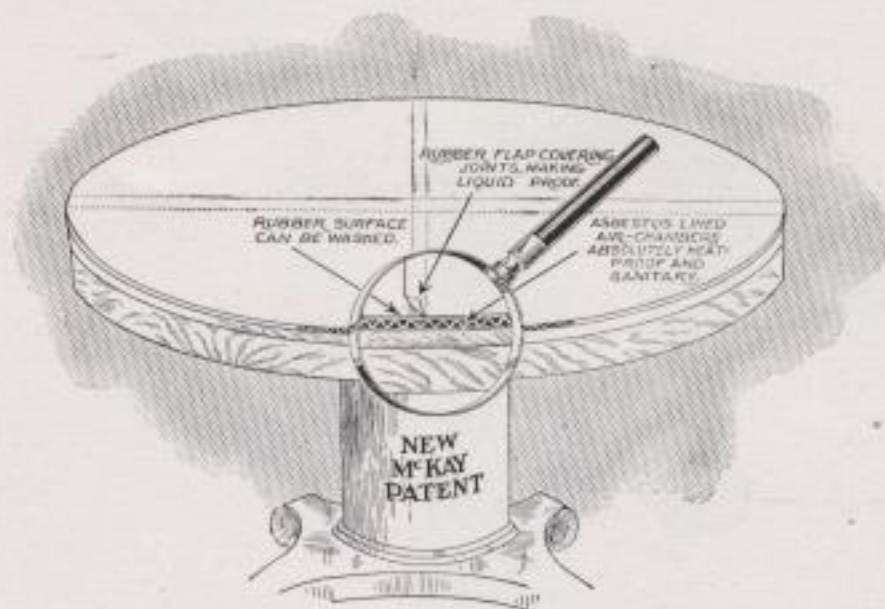

All Quartered Oak Pedestal Tables taking 45", 48", 54" or 60" tops are fitted with the Celebrated Brown Lock without extra charge.

All 42" plain and quartered and 45" plain oak pedestal tables are fitted with a lock of our own make.

Loading Mixed Cars

Our long line of furniture is designed to meet the requirements of the mixed car load buyer. We are prepared and do handle a large number of shipments from outside factories to be loaded in cars for our customers. This arrangement has proven very satisfactory to our customers as it saves expense, annoyance and time over the custom of assembling their goods in the larger centers for loading.

Our charge for this service is 5c per 100 pounds.

McKay Ventilated Table Pad

This table pad is a positive protection to every part of the table.

A folding table pad that is liquid-proof over the entire surface including the joints.

When the surface of this pad becomes soiled it may be washed perfectly clean with soap and water or a wet cloth.

An asbestos lined air chamber extends through the center of the entire pad permitting the air to circulate through it keeping it dry and sanitary and at the same time entirely heat proof.

When inverted upon the table it makes a beautiful library or card table cover. The leaves as well as the joints between them are constructed exactly like the pad protecting the table when extended as well as when used without leaves.

These are exclusive patented features and will be found in no other table pad.

Features of Napanee Sanitary Cabinets

Construction—In the construction of **NAPANEE** Cabinets we use only the best quality of thoroughly kiln-dried lumber. We operate our own Band Saw Mill in which the lumber used in the construction of all our furniture is specially manufactured for furniture stock.

Our machine men and cabinet makers are workmen thoroughly trained in furniture making and produce only the best results.

Finish—All oak **NAPANEE** Cabinets are finished in a light shade in satin finish. The cupboards in the tops and all the drawers in our oak cabinets are well finished on the inside. The backs of all cabinets are also finished.

Metal Tops—On **NAPANEE** Cabinets the metal tops are in nickel finish and are drawn over the edges of the top and fastened on the under side. This leaves the edges of the top smooth and free from any obstructions to catch dirt or to corrode. This is the most satisfactory top that can be put on a kitchen cabinet. All sliding tops have a groove on the back edge to drain any liquids that may be spilled on the top. The wood top which we cover with metal is tongued and grooved and has grooved strips across each end. This construction positively prevents warping of the top.

Bread and Cake Box—This box is made of heavy weight rust-proof tin. Size, 11½ inches deep, 10 inches wide and 24 inches long. Divided into two compartments, each fitted with a re-inforced ventilated lid that will not bend or curl. This box works on a gliding base which always keeps the box in place when extended full length. The tin box can be removed from the base for washing and drying.

Flour Bins—In **NAPANEE** Cabinets we use the sifter and the gliding flour bins. The sifter bins all have a capacity of 50 to 70 pounds of flour and are built in the top of the cabinet. All the flour must pass through the sifter as it is taken from the bin.

Tilting Bins—All tilting bins in **NAPANEE** Cabinets are made with two-ply veneer bottoms which give them unusual strength and positively prohibits warping and checking. These bins all work on roller bearings which insure an easy working bin either filled or empty.

Equipment—Every article shown on any of the cabinets on the following pages is furnished at the price quoted.

If the 8 piece cutlery set, rolling pin and potato masher are not wanted on any of the cabinets on which they are shown deduct \$1.90 from the list.

Enameled Tops—The backs in all Oak cabinet tops are heavy panels which enable us to put on a high class White Enamel Finish. This finish adds to the appearance of the cabinet and makes the cupboard sanitary. For enameled tops add \$3.75 to list.

Full Rounded Corners—The rounded corners are an exclusive feature of **NAPANEE** Cabinets, and add greatly to the sanitary value as well as to the neat appearance of the cabinet.

Convenience—The convenience of **NAPANEE** Cabinets is recognized by all dealers. The arrangement and construction is the best that years of experience in cabinet building can produce. Among the strong points of our cabinets not enumerated above are the gliding shelf in the base, easy working drawers, and the various package racks which are always accessible but never in the way of the user of the cabinet.

Cabinets Fully Equipped

Magazine advertising of any article to create a popular demand is an exceedingly expensive method of advertising which adds nothing to the value of the article advertised, but the cost of which must ultimately be paid by the consumer. Such articles must be sold for more than they are intrinsically worth or they must be sold for less profit to the dealer than other lines of less expensively advertised wares if the ultimate purchaser gets his money's worth.

Our purpose in offering you our No. 1550 specials Nos. 1, 2, 3 and 4 is purely for the advertising feature. Any one or all of these cabinets displayed in your window will at once draw the attention of the public to your store and to our cabinet. The purchaser of one of these cabinets will save dollars because he will get a better cabinet and a large assortment of useful ware for less than he can possibly buy it elsewhere.

Instead of the consumer being compelled to pay **two to three dollars** on each cabinet to cover **Magazine Advertising Expense** he receives a large assortment of high grade ware at a saving of from **five to six dollars** to himself.

Here is the plan: We buy the ware in very large quantities and secure the Jobber's discount. We add just enough to the cost of this ware to cover our selling expense and the expense of handling. This enables us to place the ware in the hands of the dealer at less cost than he can possibly buy it elsewhere. We urge the dealer to add just enough margin, to the ware, to cover his selling expense and his cost of handling—making it purely an advertising scheme and actually give the consumer the large saving in the price of these utensils as an inducement to buy a **Nappanee Sanitary Cabinet**.

The plan will produce mutual profits on account of the increased sale of cabinets.

Remember these sets may be purchased with any cabinet in our line but are not sold separately.
