

About Solaris Paper

Solaris Paper is a North American towel and tissue manufacturer focused on away-from-home distribution. Our products are recognized for being whiter, brighter, softer and smarter thanks to responsibly-managed sourcing of Rapidly Renewable Fiber (RRF) and sustainable manufacturing operations. We have a smarter way of working, too. Our vertically integrated business model provides tremendous flexibility and management control, which gives our customers improved margin opportunities and competitive pricing. All without sacrificing performance.

Our Brands **WHITER. BRIGHTER. SOFTER. SMARTER.**

Solaris Paper proudly offers a variety of lines to accommodate our partner distributors and their end-users. While all of our paper products are made with sustainable, Virgin Plantation Grown Fiber, each line offers unique attributes presented in upscale, coordinated packaging along with the high quality standard upheld by all Solaris Paper products.

LoCor® dispensers and paper products bring high style and high performance to your washrooms. Improved quality, labor savings, less waste and lower cost are all possible with LoCor® products.

MADE IN THE USA

Available in stainless steel, classic black and clean white finishes.

Our Commitment to Sustainability

Solaris Paper is committed to increasing the sustainability of our customer's facilities and businesses by providing paper towel and tissue products, along with advanced dispensing systems designed to minimize lifecycle impact.

We contribute to a sustainable building operation through extraordinary quality and value. This provides highly desirable products to end-user building occupants that are brighter, whiter and softer. We provide favorable economics to the commercial buyer and facilities management, along with a socially and environmentally responsible life cycle footprint.

Our sustainability programs apply to the full scope of our operations, extending beyond our walls upstream to our sources, including our primary strategic supply partner Asia Pulp & Paper (APP), and downstream to end-of product life scenarios.

The RRF (rapidly renewable fiber) logo is a promotional mark of Solaris Paper, Inc. and does not denote any independent or professional environmental certification(s) or certifying organization. Solaris Paper AFH towel and tissue products contain a 20% - 80% virgin rapidly renewable base fiber.

Rapidly Renewable Fiber (RRF) meets the requirements of the U.S. Green Building Council's LEED standards. Reference EQc7 of LEED EBOM 2016 (v4) and IEQc3.3 of LEED EBOM 2009 (v3).
